Office Action Summary	Application No. 10/031,563	Applicant(s) BACCELLI ET AL.	
	Examiner Pedro Philogene	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 April 2006.
- 2a) ☐ This action is **FINAL**.
- 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 13-14, the term "said second housing" lacks prior antecedent basis.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Errico et al. (5,5817,094).

With respect to claims 1, 12, 25, 35, Errico et al disclose a multiaxial connection osteosynthesis system for the spine including a bone anchor member (1200) having a head (122) a connecting member (250), a connector (200) having a first inwardly deformable housing (209,150) adapted to receive the head and integral with a second portion (204) the second portion having a U-shaped opening having an open end remote from the first inwardly deformable portion and a seat (151,156), the open end adapted to receive the connecting member (250) along an axis, the first and second

Art Unit: 3733

portions extending along the axis for clamping the connecting member in the second portion, the system including clamping means (185) for clamping the connecting member in the second housing, a clamping means wherein the connector is arranged so that, when the clamping means loads the connecting member in the second housing in the direction of the axis, the connecting member loads the seat to inwardly deform the first portion and immobilize the head therein; as set forth in column 8, lines 24-67, column 9, lines 1-22.

Although Errico et al teach of a collar with slot that is separable from the first portion, it is noted that to make the collar with slot and the first portion integral would have been obvious to one having ordinary skill in the art at the time the invention was made, since it has been held that forming in one piece an article which was formerly formed in two pieces and put together involves only routine skill in the art.. Howard v. Detroit Stove Works, 150 US 164 (1893).

With respect to claims 2-11, 1324, 26-34, Errico et al disclose all the limitations, as set forth in column 8, lines 24-67, column 9, lines 1-22; and as best seen in FIGS. 1-9.

Response to Amendment

Applicant's arguments, see Remark, filed 4/3/06, with respect to the rejection(s) of claim(s) 1-35 under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Errico et al. (5,817,094).

Conclusion

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
